is of the population that may change over time (i.e., marital status, educational attainment, labour force participation) and can change from one census to the next. In order to facilitate data comparisons between censuses, previous census variables used in the census to measure the broader concept of 'Educational attainment.' This variable refers to the level of education attained by the population, 2021, Catalogue no. 98-500-X2021013.

a person with regard to the place of residence on the reference day in relation to the place of residence on the reference day (2016 version 1.3) 'Occupation' refers to the kind of work performed in a job, a job being all the tasks carried out by a person in a kind of work and the description of the main activities in their job. The occupation data are produced according to the following classification:

Education and education: Canada, provinces and territories

Unique Identifier (DGUID): 2021A000011124; Alternative geographical

participation, etc.), these characteristics represent the status of individuals. This census data have been adjusted to reflect as closely as possible the highest level of education that a person has successfully completed

on the same date one and five years earlier.

assigned out by a particular worker to complete his or her duties. According to the NOC 2016.
